

About Splice Conferencing Services

Splice provides the best conferencing service for your budget, with superior sound quality. We combine the lowest rates in the business with the highest levels of customer service, which positions our customers to receive value for their dollar. We offer Meet-Me (On Demand) Conferencing, Operator Assisted Conferencing, Event & Web/Data Conferencing.

Meet-Me Conferencing

Meet-Me On Demand Conferencing allows you to conduct up to a 50 participant conference call at anytime. No reservations are necessary! It's as simple as dialing your toll-free number and entering your pass code. As a conference leader you will be assigned a special pass code that gives you the ability to utilize any of the functions listed below.

Features:

- Listen to participant roll call
- Sub conference with participants as required
- Billing reference no. for bill back applications
- Mute participants
- Lock conference call for added security

Web Conferencing

Our Web Conferencing is an effective and low cost way to get your point across to any number of participants. No need to travel for sales, training or your other business needs. Use Web Conferencing to present online slide presentations and other conferencing applications such as whiteboard discussions. The features are easy to use and are available on-demand.

ANYWHERE ANY TIME!

NO RESERVATIONS REQUIRED!

Getting started is as easy as 1, 2, 3...

1. Complete enrollment information Form (No contracts and no commitments!)
2. Receive personal 800# and pass code
3. Use the service!

"Splice delivered a low cost solution with the highest quality. They managed the installation of our OC3 multi-site redundant IP Verizon Solution, provided lower cost IXC circuits (Qwest, XO and VZ) between our headquarters in Texas and remote office locations in California and Colorado. We increased our redundancy diversity in carriers and routes. The beauty was we were able to do it for less cost and also the simplicity of one MSA and Invoice. This was extremely efficient as the Splice solution involved multiple tier 1 carriers."

– World-Wide IT Manager, Financial Firm
